

○Trends in high-volume electric power (for industries with contracted power of 500 kW or higher)

High-volume electric power sales rose 4.3% YoY, in part because of the improvement of production levels in industry sectors such as steel.
--

Trends in high-volume electric power for major industries *Figures in parentheses are YoY growth.

Industry sector	Overview
Paper/pulp (1.6 %)	Sales rose YoY, in part because production of corrugated cardboard stock increased.
Chemicals (2.7 %)	Although some customers increased generation of their own electric power, leading to declines in sales, sales rose YoY, in part because of higher production of petrochemicals.
Ceramics, stone and clay (24.6 %)	Sales rose YoY, in part because production of graphite electrodes and LCD glass increased as well as some customers reduced generating their own electric power, leading to some gains in electric power sales.
Iron and steel (14.1 %)	Sales rose YoY, in part because production in steel for motor vehicles and for export business increased and operation of newly built steel plants increased.
Machinery (1.4 %)	Although some customers reduced production, sales rose YoY, in part because of increased production of semiconductors for digital consumer electronics.

Amount of electric power sold, by high-volume industry sector

		YoY growth (%)						Electric Energy sold (GWh)	Percentage of total (%)
		2008 1st half	2nd half	2009 1st half	2nd half	2010 1st half	2nd half		
Raw materials	Paper/pulp	-2.3	-10.2	-7.5	11.3	9.1	1.6	784	3.1
	Chemicals	-0.2	-15.0	-15.8	7.3	4.2	2.7	1,375	5.5
	Ceramics, stone and clay	4.4	-12.1	-27.4	-13.7	18.9	24.6	1,378	5.5
	Iron and steel	0.7	-34.3	-35.5	17.2	39.4	14.1	3,077	12.3
	Nonferrous materials	-2.3	-39.8	-27.2	15.0	23.6	14.0	776	3.1
Subtotal		0.5	-25.0	-26.5	7.8	22.5	12.1	7,390	29.5
Processing	Foodstuffs	0.5	-2.5	-3.0	-1.7	3.6	5.2	1,240	5.0
