

Overview of Tokuyama Hydroelectric Power Station

Plan overview diagram

Plan specifications

Plan location	In the Fujihashi area, Ibigawa-cho, Ibi-gun, Gifu Prefecture
River name	Ibi River, a class A river in the Kiso River System
Dam name	Tokuyama Dam (rock-fill dam, 161 m high)
Power generation systems	Unit 1: dam and conduit-type power; Unit 2: dam-type power
Maximum output	153.4 MW (131 MW in Unit 1, 22.4 MW in Unit 2)
Start of power generation facilities work	October 2009
Start of operation	Unit 1: June 2015; Unit 2: June 2014

Underground power station shaft

Construction status at Tokuyama Hydroelectric Power Station (November 16, 2011)
