

Consolidated Interim Financial Report FY ending March 31, 2005

The information shown below is an English translation of extracts from the Chukan Kessan Tanshin (Renketsu) (Consolidated Interim Financial Report).

CHUBU ELECTRIC POWER COMPANY, INCORPORATED (November 9, 2004)

Code: 9502

Financial Report for the 6-months Period ended September 30, 2004

(Consolidated)

Contact : Toshihiko Suzuki, Manager, IR Section

Toshio Saitou, Manager, Accounting Section

Unit Stock: 100 shares per unit

TEL: 81-52-951-8211

URL: <http://www.chuden.co.jp/english/>

Adaptation of U.S. accounting standard : None

Note: FY 2005 starts on April 1, 2004 and ends on March 31, 2005.

. Performance Over the 6-months Ended September 30, 2004

(Figures are rounded down to the nearest million yen)

1. Consolidated Operating Results

	9/04	Change	9/03	Change	3/04
Operating Revenues (million yen)	1,075,952	3.1%	1,043,593	-5.9%	2,101,072
Operating Income (million yen)	223,418	22.7%	182,107	-18.3%	334,411
Ordinary Income (million yen)	163,658	35.4%	120,890	-20.1%	184,925
Net Income (million yen)	68,127	-7.7%	73,826	-22.4%	114,717
Net Income per Share (Primary ; yen)	94.04		101.08		157.21
Net Income per Share (Fully diluted ; yen)	87.48		94.14		146.64

*Ordinary Income: Income before provision of reserve for fluctuation in water levels, income taxes and minority interests

Notes: 1. Equity in earnings of affiliates

(9/04: 1,079 million yen, 9/03: -499 million yen, 3/04: -1,157 million yen)

2. Average number of shares outstanding (consolidated)

(9/04: 724,459,984 9/03: 730,411,940 3/04: 728,073,170)

3. Changes in accounting methods: Yes (adoption of the "accounting standard for impairment of fixed assets")

2.Consolidated Financial Standing

	9/04	9/03	3/04
Total Assets (million yen)	5,885,782	6,214,735	6,060,177
Shareholders' Equity (million yen)	1,413,866	1,353,595	1,377,180
Shareholders' Equity Ratio	24.0%	21.8%	22.7%
Shareholders' Equity per Share (yen)	1,953.14	1,861.52	1,897.81

Note : Number of shares outstanding at the end of the period. (consolidated)
(9/04: 723,894,139 9/03: 727,146,248 3/04: 725,535,700)

3.Outline of Consolidated Cash Flows

	9/04	9/03	3/04
Cash Flows from Operating Activities (million yen)	300,182	245,052	592,362
Cash Flows from Investing Activities (million yen)	-67,844	-106,525	-199,324
Cash Flows from Financing Activities (million yen)	-231,913	-133,208	-395,210
Cash or Cash Equivalent at the End of the Period (million yen)	60,282	67,379	59,854

4.Number of Subsidiaries and Affiliates

Consolidated subsidiaries: 32

Unconsolidated subsidiaries accounted for under the equity method: None

Affiliates accounted for under the equity method: 19

5.Changes in Range of Consolidation and Application of Equity Method

Inclusion of subsidiaries to consolidation: 1

Exclusion of subsidiaries from consolidation: None

Inclusion of subsidiaries or affiliates accounted for under the equity method: 1

Exclusion of subsidiaries or affiliates accounted for under the equity method: None

.Forecasts of Consolidated Results for the Year Ending March 31, 2005(approximate estimates)

	3/05
Operating Revenues (billion yen)	2,100
Ordinary Income* (billion yen)	190
Net Income (billion yen)	90

*Ordinary Income: Income before provision of reserve for fluctuation in water levels, income taxes and minority interests

(Reference) Estimation of Net Income per Share for the year ending March 31, 2005: 123.98 yen

There are the premise or matters related to these forecasts on page 11.

Corporate Group Position

With Chubu Electric Power Company, Incorporated's electric power business at its core, the Chubu Electric Group (the Company and its subsidiaries and affiliates) is making efficient use of our own business resources, such as electricity supplying facilities, fuels and technologies, to develop a variety of businesses. Specifically electric power-related areas include construction for the upgrade and maintenance of facilities, and manufacture for the supply of materials and equipments. The Company is also developing new businesses, such as an electronic communications business, with the aim of making efficient use of business resources.

(Notes) *1 Chubu Electric Power Company U.S.A. Inc. has been included in the scope of consolidation through investment.

*2 Compañía de Generación Valladolid, S. de R.L. de C.V. has been included in the scope of the equity method through investment.

*3 Toho Oil Co., Ltd. changed its scope of business, and accordingly its business segment has been changed from "manufacturing" to "service"

Management Policies

1. Basic Management Policy

Competition continues to intensify in line with the liberalization of retailing of electric power: the revised Electricity Utilities Industry Law was enacted June 2003, and so the scope of liberalization was expanded in April 2004 to cover customers requiring a supply of over 500kW of high-voltage electricity. Starting from FY2006, every customer receiving high-voltage electricity will be included in the scope of the liberalization. It is anticipated that in order to further promote competition, a wholesale market for trading electric power and an independent council for reviewing transmission network utilization starts operation and the network utilization tariff system is to be revised.

Under these conditions, our Company, as a "Multi-energy Company" in the central region of Japan, aims to provide new services and values as well as energy for sustainable growth in unity with the Group. The Company has therefore defined new Mid-term Financial Targets and concrete operational policies, as described below, in order to accelerate efforts toward meeting the expectations of customers, shareholders and investors.

[Mid-term Financial Targets]

Item	Consolidated Targets	Non-consolidated Targets	Target Year
ROA (Return on Assets)*1	4.5% or more	4.5% or more	On annual average basis between FY2005 and FY2007
Ordinary Income*2	¥165 billion or more	¥160 billion or more	
Capital expenditure	¥200 billion or less	¥170 billion or less	
Free cash flow *3	¥360 billion or more	¥350 billion or more	By the end of FY2007
Outstanding interest-bearing debts	¥3,100 billion or less	¥3,000 billion or less	

*1 --- ROA (Return on Assets) = (Ordinary Income*2 + Interest expenses) / Average total assets at beginning and end of the period.

*2 --- Ordinary Income

consolidated: Income before provision of reserve for fluctuation in water levels, income taxes and minority interests

non-consolidated: Income before provision of reserve for fluctuation in water levels and income taxes

*3 --- Free cash flow = Operating cash flow – Investing cash flow

[Operational Policies]

(1) Develop sales activities to satisfy customers

To continue to attract as many customers as possible, the Company is improving contract options and services to properly meet the diverse needs of individual customers. The Company makes maximum use of the Group's business resources in order to provide a variety of new services in the areas of energy involving gas supply and on-site power generation sources.

(2) Strengthen cost competitiveness in the new market environment

In order to deliver premium services at lower prices as the market undergoes drastic changes, such as the review of the electricity utilities industry structure and the intensifying competition involving different kinds of energy, the Company aims to raise efficiency in each stage of business and to securely achieve the goal, "a 20% reduction in costs from pre-liberalization figures by FY 2006".

(3) Reinforce corporate strength and strategically utilize business resources for growth

The Company will set up and securely reach managerial goals of increasing profitability, further improving the financial condition and collective strengths of the Group. In pursuit of sustainable growth, the Company will effectively allocate its profit to expand energy business areas and will invest in new businesses where the Company has an advantage.

(4) Reinforce the corporate foundation for the whole group and act as a good corporate citizen

The Company will reinforce its cooperative and integrated management system involving the main company and its group companies in order to flexibly cope with difficult management environments and to make the corporate group more competitive.

While striving toward harmonious coexistence with society, the Company will actively fulfill its social responsibilities as a corporate citizen. Specifically, the Company will promote compliance with laws, internal rules, and corporate ethics; tackle global environmental issues; and strengthen its relations of trust with local communities.

2. Basic Policy for Profit Sharing

In addition to redistributing to shareholders, operational results generated by the Company will be effectively used for activities and investments to improve the Company's financial condition and expand the revenue sources, thereby enhancing the corporate value. Internal reserves will be used as funds for capital expenditure in the electric businesses, investment in new businesses and improvement of the Company's financial condition.

3 Fluctuation Factors Concerning Operating Results

The following variables regarding the business performance and financial condition of the Group could significantly affect investor judgment.

(1) Risks concerning economic climate

(a) Economic Conditions and Weather Conditions

In the electricity business, which is the Company's core business, the electricity sales depends on economic trends and changes in temperature. Therefore, the Group's performance may be affected by both economic and weather conditions.

The annual amounts of rainfall and snowfall affect the amount of hydroelectric energy output, consequently affecting the overall cost of power generation. However, the Reserve-for-Drought System minimizes the effect on the Group's performance.

(b) Changes in Fuel Prices

Fuel expenses, which are a major expense item in the electricity business, are affected by changes in CIF costs, foreign exchange rates and so on because the Company depends on imports of liquid natural gas (LNG), coal and crude oil.

However, since changes in fuel price are reflected in electricity charges according to the price adjustment system reflecting fluctuations in fuel costs, fuel price fluctuations have only a limited effect on the performance.

(c) Changes in Interest Rates

The Group's outstanding interest-bearing debt was ¥3,608.1 billion as of September 2004, or 61.3% of the total assets. Interest expenses, which are a major expense item, are likely to be affected by future changes in market interest rates.

However, 87.2% of the outstanding interest-bearing debt is long-term funds including corporate bonds, convertible bonds and long-term loans, and most of those funds were raised at fixed interest rates. The Company is making every effort to reduce the outstanding interest-bearing debt in order to strengthen its financial condition.

Therefore, changes in interest rates have only a limited effect on the performance.

(2) Risks concerning group companies' business activities

(a) Trends of the Electricity Utilities Industry Structure

In the electric utility business, the scope of liberalization of the electric power retail sector will be expanded starting from April 2005. In addition, the Japan Electric Power Exchange and Electric Power System Council, an independent organization, is scheduled to start operating and the transmission network utilization rate system will be reviewed.

Regarding the nuclear power back-end business, which is an ultralong-term and uncertain business, measures will be taken to promote nuclear power generation and the relevant back-end businesses, and the detailed system is being developed accordingly.

To respond to these changing environments, the Group is making every effort to maximize the efficiency of management and develop aggressive sales activities that will appropriately meet the needs of customers. Nevertheless, revisions to the system and intensifying competition in the future could have an effect on the performance.

(b) Businesses other than Electric Utility Business

Our Group (comprising Chubu Electric Power Company and its affiliates) is committed to the effective deployment of its business assets in the core business of supplying electric power. The Group is also involved in other energy businesses that utilize electric power supply facilities, stored fuels and technologies. In addition, it establishes networks for its IT/telecommunications business that supply information with added value. Other businesses in which the Group is involved include construction for development and maintenance of various facilities, the manufacturing of materials and machinery, and the development of various businesses. If these businesses fail to deliver the results expected by the Group under changing business environments as competition with other enterprises becomes stiffer, they could have an effect on the performance.

(3) Other Risks

(a) Natural Disasters

The Group's unified power supply system operates at every level from generation to distribution. In order to supply electric power of high quality in an economical and stable manner, the Group has constructed and is maintaining various facilities for minimizing service interruptions caused by lightning and other natural phenomena. However, large-scale natural disasters, such as typhoons, and accidents are likely to affect the Group's performance

(b) Leakage of Personal Information

Customers' personal information is collected and maintained in order to offer services as a public utility, but any leakage of such information could cause problems that could have an effect on the performance.

(c) Shutdown of Units No.1 and No.2 of the Hamaoka Nuclear Power Plant

Regarding Units No.1 and No.2 of the Hamaoka Nuclear Plant, the inside of each reactor core was inspected for a technical evaluation of aging and cracks were found in the core shrouds and other parts. All equipment in which cracks were found will be repaired in order to ensure stable operations, conserve labor for continuous monitoring of those cracks, and avoid prolonging regular inspections in the future. In consideration of the time required for replacing the core shrouds, the regular inspection period was extended to March 2007 for Unit No.1 and to June 2006 for Unit No.2. Since it is difficult to determine specific processes at present, the upcoming shutdown could affect performance.

4. Corporate Governance

(1) Principles of Corporate Governance

The company must enhance efficiency in management and ensure legitimacy so that shareholders and investors will see it as a reliable corporation. The company will redouble its efforts to ensure corporate governance.

(2) Measures Implemented for Corporate Governance

An overview of the management mechanism and the measures taken toward corporate governance is as follows:

In addition to the Board of Directors, auditors, and other aspects prescribed by the Commercial Code, the Company has a Board of Managing Directors and holds a Managerial Strategy Meeting. In principle, a meeting of the Board of Directors is held monthly. At those meetings, the board decides on resolutions stipulated by the Commercial Code and corporate key issues in management. As well, it oversees the duties of the directors with reports on the how those duties are being carried out. At the meetings of the Board of Managing Directors, matters referred to the Board of Directors are discussed in advance and other important issues in operations are deliberated. At the Managerial Strategy Meeting the direction of mid- and long-term management is discussed. The conference refers important matters on to the Board of Managing Directors and the Board of Directors.

According to the principles decided upon at the meeting of the Board of Auditors, the auditors individually and independently monitor how the duties of the directors are carried out. In June 2004, the number of auditors was increased from six including two external auditors, to seven including four external auditors in order to strengthen the auditing capacity. The four external auditors and our Company are independent from each other.

The Internal Audit which was expanded from the Internal Audit Department is in charge of internal auditing. It monitors the business executions of each division and provide advices to improve their management. The company is establishing internal-audit system focusing risk-management.

Regarding compliance management, we have established the “Chubu Electric Power Group Compliance Declaration” and “Eight Codes of Conduct” at the initiative of the Compliance Promotion Committee. Also, we are actively working to raise awareness among all employees. In addition to the internal consultation department, we have appointed a lawyer as a contact for compliance-related consultations (such as for whistle-blowing), thereby offering diverse approaches to consultation.

The Chubu Electric Power Group Compliance Promotion Committee is developing a compliance-related contact shared by the Group and making other efforts to establish the Chubu Electric Power Group’s compliance

Operating Results and Financial Standing

1. Overview of results of the first-half term

(1) Summary of Consolidated Revenues and Expenditure

With the growth in capital investment attributable to improvement in corporate profits and with the healthy trend in consumer spending due to improving employment conditions, the Japanese economy in the first half of FY2005 was on course to recovery.

Under these economic conditions, operating revenues for the first-half term were ¥1,075.9 billion, an increase of ¥32.3 billion from the same period last year, and ordinary revenues were ¥1,080.6 billion, an increase of ¥33.3 billion from the preceding period, mainly due to an increase in electric power revenues in the electric utility business.

Ordinary expenses were ¥917.0 billion, a decrease of ¥9.3 billion from the preceding period as a result of a reduction in personnel expenses and maintenance expenses in the electricity business.

Consequently, ordinary income was ¥163.6 billion, an increase of ¥42.7 billion from the preceding period.

Impairment loss of ¥44.6 billion was recorded as extraordinary loss through early adoption of the “accounting standard for impairment of fixed assets” in the first half of this fiscal year, and accordingly, interim net income decreased by ¥5.6 billion from the preceding period to ¥68.1 billion.

a. Operating Revenues and Expenditure (Before offset elimination)

(i) Electric Utility Business

Electric energy sold increased by 5.8% from the preceding period to 64.1 billion kWh mainly due to the economic recovery and increased demand for air conditioning. Specifically, demand for electric lighting increased by 7.7% to 16.5 billion kWh mainly due to increased demand for air conditioning during the summer, which was hotter than the previous summer. Demand for electric power increased by 5.0% to 18.8 billion kWh mainly due to the effect of air temperature and steady production activities. Demand from customers under liberalization increased by 5.3% to 28.8 billion kWh on the back of strong exports to Asian countries and the United States and the effect of air temperature.

Regarding electric energy supply, hydroelectric power output was 6 billion kWh, or a 6.2% decrease from the preceding period due to a decline in water supply rate from 116.0% for the same term last year to 106.3% for this term, although the water supply remains ample.

Nuclear power output increased by 140.7% from the preceding period to 12.2 billion kWh mainly due to smooth operations at Units No.3 and No.4 of the Hamaoka Nuclear Power Plant, which had been closed during the first half of the previous fiscal year.

Under these circumstances, the amount of electric energy generated by thermal power plants decreased by 5.8% from the preceding period to 43.8 billion kWh.

Operating revenues generated by the electric utility business increased by ¥32.4 billion from the preceding period to ¥1,038.5 billion largely due to an increase in electric power revenues as a result of increased electric energy sold.

Although the amount of depreciation and amortization increased due to the trial running of Unit No.5 of the Hamaoka Nuclear Power Plant, operating costs decreased by ¥8.8 billion from the preceding period to ¥818.4 billion due to a reduction in personnel expenses including employee retirement benefits and a decrease in maintenance expenses attributable to fewer regular inspections and maintenance works at the nuclear power plants.

Under these circumstances, operating income increased by ¥41.2 billion from the preceding period to ¥220.1 billion.

(ii) Other Businesses

Operating revenues from other businesses were ¥124.8 billion, a decrease of ¥6.5 billion from the preceding period mainly due to declining revenues from the construction business and the IT-telecommunication business as a consequence of increased competition in the industry.

Operating costs were ¥122.0 billion, a decrease of ¥6.2 billion from the preceding period mainly due to a reduction in costs caused by a drop in revenues from the

construction business and the IT-telecommunication business.

Under these circumstances, operating income was ¥2.7 billion, a reduction of ¥0.3 billion from the preceding period.

b. Interim Ordinary Income

Non-operating revenues increased by ¥1 billion from the preceding period to ¥4.7 billion mainly due to improved performance of affiliated companies in the scope of the equity method. Total ordinary revenues including operating revenues were ¥1,080.6 billion, an increase of ¥33.3 billion from the preceding period.

Non-operating expenses amounted to ¥64.4 billion, a decrease of ¥0.4 billion from the preceding period, resulting from a decrease in expenses accruing from the buyback and cancellation of bonds while interest expenses increased with the increase in early repayment. Interim ordinary expenses including operating expenses totaled to ¥917.0 billion, a decrease of ¥9.3 billion from the preceding period.

Consequently, interim ordinary income amounted to ¥163.6 billion, an increase of ¥42.7 billion from the preceding period.

c. Interim Net Income

Because of the ample water supply available for hydroelectric power generation during the first-half term (water supply rate: 106.3%), the provision of reserve for fluctuations in water levels was ¥2.3 billion as required under Article 36 of the Japanese Electric Utility Law.

Gains on disposition of securities were recorded in the amount of ¥5.6 billion as extraordinary income. Impairment loss of ¥44.6 billion was recorded as extraordinary loss through early adoption of the “Accounting Standard for Impairment of Fixed Assets” starting from the first-half term of this fiscal year.

Consequently, interim net income before income taxes and minority interests amounted to ¥122.3 billion, and interim net income determined by deducting corporate taxes and other adjustment values from the above net income amounted to ¥68.1 billion, a decrease of ¥5.6 billion from the preceding period.

(2) Summary of Consolidated Financial Conditions

a. Summary of Assets, Liabilities and Shareholders' Equity

(i) Assets

The value of property, plant and equipment assets for the electric utility segment was ¥4,165.6 billion, a decrease of ¥132.2 billion from the end of the previous term, mainly due to reduced capital expenditures and the effect of annual depreciation and also because no large-scale electric power sources were completed during the term.

The value of fixed assets for other businesses was ¥255.4 billion, a decrease of 38.2 billion from the end of the previous term, mainly due to the effect of annual depreciation and recording of impairment loss through early adoption of the accounting standard for impairment.

The value of assets regarding construction in progress was ¥500.6 billion, a decrease of ¥44.3 billion from the end of the previous term, mainly due to recording of depreciation expenses and impairment loss as a result of the trial running of Unit No.5 of the Hamaoka Nuclear Power Plant.

The impairment loss recorded through early adoption of the accounting standard for impairment was ¥44.6 billion, mainly including idle assets of ¥34.6 billion.

Current assets were ¥294.0 billion, an increase of ¥41.8 billion from the end of the previous term, mainly due to an increase in notes receivable and accounts receivable and an increase in inventories.

Consequently, total assets amounted to ¥5,885.7 billion, a decrease of ¥174.3 billion from the end of the previous term.

(ii) Liabilities

Total liabilities amounted to ¥4,450.7 billion, a decrease of ¥208.3 billion from the end of the previous term, mainly due to a reduction in interest-bearing debt as a result of early repayment of bonds and debts.

(iii) Shareholders' Equity

Interim net income amounted to ¥68.1 billion mainly due to an increase in electric power revenues as a result of increased electric energy sold and also due to a reduction in personnel expenses and maintenance expenses in the electric utility business. Accordingly, total shareholders' equity increased by ¥36.6 billion from the end of the previous term to ¥1,413.8 billion.

Consequently, the shareholders' equity ratio increased by 1.3% from the end of the previous term to 24.0%.

As a result of the share buyback during this first-half term, the remaining treasury stock amounted to ¥28.6 billion at the end of this first-half term.

(b) Cash Flows

(i) Cash flows conditions

The consolidated group mainly uses cash and cash equivalents (hereinafter referred to as "cash") obtained from operating activities to mainly purchase in new capital assets, to improve its financial condition, and to return the profits to the shareholders by means of buybacking share and paying dividends.

Cash flows from operating activities resulted in an increase in cash of ¥300.1 billion, or a 22.5% increase from the preceding period, due to an increase in electric power revenues with the increased electric energy sold and due to a reduction in cash expenditure for settlement of notes payable and accounts payable.

Cash flows from investing activities resulted in a decrease in cash of ¥67.8 billion, or a 36.3% decline from the preceding period, owing to cost reduction efforts such as the restraint of capital investment.

Cash flows from financial activities contributed to a decrease in cash of ¥231.9 billion, or a 74.1% increase from the preceding period, attributable to the repayment of interest-bearing debts, share buybacks, and dividend payouts.

Consequently, the cash balance at the end of this first-half term increased 0.7% compared with the end of the previous term to ¥60.2 billion.

The outstanding interest-bearing debt was ¥3,608.1 billion at the end of this first-half term, a 5.3% decrease from the end of the previous term.

(ii) Cash flows indexes

The shown below is the Group's cash flows indexes.

	9/04	9/03	FY2004	FY2003	FY2002
Shareholders' equity ratio	24.0%	21.8%	22.7%	20.8%	19.1%
Shareholders' equity ratio at market value	28.7%	25.5%	27.5%	24.7%	23.7%
Debt repayment term	-	-	6.4years	6.9years	6.5years
Interest coverage ratio	6.0	5.1	6.0	4.9	4.4

(Notes)

1. Shareholder's equity ratio: Shareholders' equity/Total assets

- It is calculated with figures on consolidated basis. (So are the other notes below)

2. Shareholders' equity ratio at market value: Total shares at market value/Total assets

- Total shares at market value is calculated as follows: [Last price of shares at the end of the period × Number of shares outstanding at the end of the period]

3. Debt repayment term: Interest-bearing debts/Operating cash flows

- Interest-bearing debts means interest-payable debts, which is a part of the liabilities on the consolidated balance sheets.
- Operating cash flows on the consolidated cash flows statements apply to cash flows from operating activities used on this calculation. (So is a note below)

4. Interest coverage ratio: Operating cash flows/Interest payments

- Interest payments on the consolidated cash flows apply to interest payments used on this calculation.

(3) Interim Dividend Period

Board of directors has decided to pay the interim dividend of ¥30 at the board of directors on November 9, 2004.

2. Outlook for the full full FY 2005

Electric energy sales in the electricity business for the period ending March 31, 2005 will be approximately 1,250 billion kWh, a 2.3% increase from the previous period.

By promoting efficiency over the whole operating activities as well as cost reduction such as facilities- related expenses, the outlook for performance in the next period will be as follows.

(Outlook for performance in the full FY 2005)

	Consolidated	Non-Consolidated
Operating revenues	(0.0% decrease) approximately ¥2,100.0 billion	(0.1% increase) approximately ¥2,025.0 billion
Operating income	(10% decrease) approximately ¥302.0 billion	(9% decrease) approximately ¥294.0 billion
Ordinary Income*	(3% increase) approximately ¥190.0 billion	(6% increase) approximately ¥185.0 billion
Net income	(22% decrease) approximately ¥90.0 billion	(19% decrease) approximately ¥90.0 billion

* Ordinary Income

consolidated: Income before provision of reserve for fluctuation in water levels, income taxes and minority interests

non-consolidated: Income before provision of reserve for fluctuation in water levels and income taxes

(Principal figures on which outlook are based)

Item	9/04	3/05(assumed)	9/03	3/04
CIF crude oil prices (\$/b)	36.8	approx.41	28.4	29.4
Exchange rate (Inter-bank) (¥/\$)	110	approx.110	118	113

*The above forecasts and assumptions made in relation to uncertain factors that may influence performance in the future, was made based on the information available at the time of the release of this document. There is a possibility that the actual performance may greatly differ due to various unforeseen factors in the future.

Results of Production and Sales

[Electric Power Business]

1. Electric energy sold (100 million kWh, %)

	9/04 (A)	9/03 (B)*	Change	
			(A-B)	(A-B)/ B
Customers other than those under liberalization				
Electric lighting	165	153	12	7.7
Electric power	188	179	9	5.0
Sub total	353	332	21	6.3
Customers under liberalization	288	274	14	5.3
Total	641	606	35	5.8

Note: Customers under Liberalization in FY 2004 is re-categorized in the same definition as is in FY 2005, ie. customers whose demand is 500 kW or above to calculate the yoy ratios.

2. Output and purchase of electric power (100 million kWh, %)

		9/04 (A)	9/03 (B)	Change	
				(A-B)	(A-B)/B
Chubu Electric	Hydroelectric power (water supply rate)	60 (106.3)	65 (116.0)	-5 (-9.7)	-6.2
	Thermal power	438	465	-27	-5.8
	Nuclear power (utilization rate)	122 (61.8)	50 (31.8)	72 (30.0)	140.7
Interchanged power		15	20	-5	-26.6
Purchased power		74	69	5	7.2
Power used for pumped storage		-12	-9	-3	28.1
Total		697	660	37	5.6

Consolidated Balance Sheets

(million yen)

Assets	2004.9	2004.3	2003.9
Property, Plant and Equipment	5,591,666	5,807,837	5,905,850
Electric utility property, plant and equipment	4,165,674	4,297,914	4,393,356
Hydroelectric power production facilities	363,712	374,308	384,549
Thermal power production facilities	854,301	901,843	962,084
